29. Chat Group Thread

Profile Picture Sizes

This screen explains the various sizes that the profile picture will use throughout the DigiMobile app.

X-small

Primarily used as part of the group chat profile icon that displays on the chat list screen. The combined icon below mimics the group chat icon currently used in iOS9.

Small

Used on sip and chat screens on contacts list and recent calls/chats screens

Medium

Used on profile edit and select profile photo screens, and Find Guest list

Large

Only used on the social media View Profile page. Size allows users to quickly scan other users before deciding to read their profile information.
