

Font Styles

Sharing My Health Data will use a mix of Dooku Kit and 2023 FB Color Update font styles.

Note: Dooku web kit site is no longer available on stage

1

For <h1>s, use class .h1-small (Dooku Kit)

2

For <h2>s, use class .h1-tiny (Dooku Kit)

Sharing with Third-Party Apps

Florida Blue and Florida Blue Medicare members can manage who has access to their protected health information (PHI). As a member, you can now request an electronic copy of your PHI using third-party applications (apps) of your choice.

Third-party apps are independent of Florida Blue and Florida Blue Medicare. You can use an app to access your PHI, like your claims history, prescriptions, and doctor's visits. ⓘ

App Status

Below is all your third-party app information. You can see your data-sharing status with each app and take action if needed.

When you click Stop sharing below, any protected health information (PHI), including sensitive information, will stop being sent to the app. Any PHI you've already shared may continue to be stored by the third-party app.

↕ App Name	↕ Last Update	↕ Status	Action
ActiveWell	10/02/2018	⏸ Stopped	Details >
Wellness Plus	10/02/2018	✅ Active	Stop sharing Details >
OneRecord	10/02/2018	🕒 Expired	Details >
Total Wellness and Activity Management Solutions	10/02/2018	✅ Active	Stop Sharing Details >

Data-sharing expires every 90 days.

To keep sharing your data, you'll need to re-approve Florida Blue from your app every 90-day cycle.

Have questions? [Learn more](#) about sharing your data with third-party applications.
